

Africa's Next Green Leaders Eccelerator (ANGLE)

ANGLE is an African-curated accelerator dedicated to identifying, mentoring, funding, and investing in emerging youth climate leaders across the African continent. It offers a comprehensive 12-month program that transforms promising climate initiatives into continent-wide sustainable solutions, providing tailored business development support, mentorship, and funding opportunities.

ANGLE's flagship activities include the African Youth Bootcamp for Climate (AYBC), pre- and post-bootcamp virtual master trainings, project and business development support, acceleration funding and re-granting, as well as engagement in multilateral climate processes and global events.

Program Details and Impact

Energy Access

Focusing on renewable energy solutions and expanding clean energy access across African communities.

Sustainable Agri-Food Systems

Developing climate-smart agricultural practices and food systems that enhance resilience and sustainability.

Climate Resilience

Building adaptive capacity and implementing solutions that help communities withstand the impacts of climate change.

African Youth Bootcamp for Climate (AYBC)

The African Youth Climate Bootcamp (AYCB) is a core component of ANGLE, a week-long, in-person master training retreat that marks the beginning of the acceleration journey for the Next Green Leaders. Starting in 2025, the Bootcamp is scheduled to take place from 11th to 15th August in Nairobi, Kenya.

The AYCB brings together 25-30 promising young climate leaders from across Africa to learn, connect, and strengthen their initiatives through guided masterclasses, immersive training, and collaborative experiences.

Key Objectives

- Identify and empower outstanding young climate leaders with tailored acceleration services.
- Secure regranting funds to provide seed support for piloting and scaling initiatives.
- Foster collaboration between diverse stakeholders through an intergenerational approach.
- Enhance the participation and influence of young Africans in climate discourse at national, continental, and global levels.

Unique Value Proposition

African-led Program

An African-led and African-curated program dedicated to scaling youth climate initiatives and systematically addressing the fragmentation in their support ecosystems.

Core Pillars

Focused on scalability, innovation, practicability, and collaboration as core pillars.

Comprehensive Approach

Combining in-person bootcamps, virtual mentorship, and global exchange opportunities.

Critical Funding

Provides critical seed funding to pilot and validate scalable, sustainable solutions.

Why It Matters

With nearly 70% of sub-Saharan Africa's population under the age of 30, the continent possesses an unprecedented demographic advantage that can drive transformative climate action. However, most youth-led initiatives remain fragmented and under-resourced. ANGLE bridges these gaps by positioning youth not as beneficiaries but as innovative solution providers and policy shapers in Africa's climate response.

Next Steps

The inaugural AYBC cohort of ANGLE is set to launch in 2025, with a focus on energy access, sustainable agriculture, and climate resilience. Partners are invited to support Africa's next generation of green leaders through funding, expertise, in-kind contributions, and access to their network.
